

2 POINT PERSPECTIVE CITY

Create a City Designed by you! You will need to create this in landscape (11" x 8.5"). Come up with unique buildings, and placement. What type of buildings/businesses do you want? Spend time on this be creative and have fun with it.

Print and Turn into Hand In Folder: Save as City PerspectiveLastNameFirstInitial

- 10 Exceptional Work- Beyond Expectations
- 9-6 Proficient Good Work- meets expectations
- 5-3 Satisfactory work- Below Expectations
- 2-0 Work needs improvement

10	0	Students clearly understand the concept of two-point perspective and created a cityscape that reflects it. Using the perspective grid tool
10	0	Final project features <i>at least</i> seven building one on the corner and three on each side The student included at least two gradients (linear and radial, with appropriate colors) in their project.
10	0	Project includes <i>at least</i> three advertisements (on building or billboards) that were live traced in illustrator prior to being placed on the perspective and other Building signs. Eet.
10	0	The student added windows and door/s to the building, add in correct perspective.
10	0	Details were added that add to the city scape, example, totally different buildings, color, depth of buildings etc.
10	0	The project exhibits interesting use of space. The height of the buildings, the balance between the sides and the overall composition were thoughtfully done.
10	0	The final project is complete with sky streets sidewalks etc. Also students name in lower right hand corner as part of the art.
10	0	Student put his/her best effort into the project. Final project reflects good craftsmanship and is professional and well designed and shows time spent.
