

# GE AEROSPACE

Hello Miami Valley,

Back in October, I sent out a flyer for our Power Plant Mechanic position. However, our Applicant Tracking System is down until January and candidates probably will not be able to apply for weeks. Therefore, if you have any interested candidates, please email me their name and contact information and I will have the recruiter contact them. Also, they can go to:

<https://jobs.gecareers.com/aviation/global/en/job/P-100076/Hourly-Production-Manufacturing>

and place their information on our interest form and a recruiter will reach out. Just note, as I mentioned above, completing an actual application won't be available until January.

Thanks,

**LeRoy Eldridge**
